LAKNIDU THILAKAWARDHANA

DEVOPS & SOFTWARE ENGINEER

laknidut@gmail.com | +44 7700 900123 | laknidu.dev | github.com/laknidu777 | linkedin.com/in/laknidu-thilakawardhana-411783247

PROFILE SUMMARY

DevOps and Software Engineer with proven expertise in orchestrating scalable cloud infrastructure, automated CI/CD pipelines, and high-performance full-stack applications. Experienced in Docker, Kubernetes, AWS, and modern microservices using .NET, NestJS, and Next.js. Dedicated to system reliability, infrastructure-as-code, and crafting frictionless developer workflows.

WORK EXPERIENCE

Senior Software & DevOps Engineer - TechNova Solutions **Jan 2024 - Present**

- Architected and managed scalable cloud deployments on AWS with automated CI/CD pipelines using GitHub Actions, cutting release cycles by 55%.
- Implemented micro-frontend architectures with Next.js and optimized backend rendering pipelines, resulting in a 40% reduction in latency.
- Containerized core services with Docker and orchestrated workloads on Kubernetes, maintaining 99.98% system uptime.

Full Stack Developer - Creative Digital Agency **Jun 2021 - Dec 2023**

- Engineered interactive web applications for high-profile client systems using Node.js, Next.js, and PostgreSQL with Prisma ORM.
- Automated provisioning with Ansible scripts and configured Nginx reverse proxies with SSL termination for production clusters.
- Built modular RESTful APIs and mentored junior software engineers in clean code and test-driven development.

Research Assistant - University Human-Computer Interaction Lab **Sep 2019 - May 2021**

- Conducted empirical research on novel interaction paradigms and real-time collaboration tools with WebSockets and D3.js.
- Co-authored 2 research papers accepted at premier ACM conferences (CHI & UIST).

EDUCATION

BSc (Hons) in Software Engineering (First Class Honours) **2021 - 2024**

University of Plymouth

PROJECTS

Work Projects

COCO-VANTAGE

Next.js, NestJS, Prisma, PostgreSQL, Docker, GitHub Actions, Neon, Tailwind CSS

Enterprise-grade freelance web platform featuring high-throughput backend services, automated containerized deployments, and responsive analytics dashboards.

Kivi

Flutter, Dart, Docker, GitHub Actions

Cross-platform mobile application providing seamless real-time notifications, modular state architecture, and containerized API sync.

Personal Projects

Neon Nexus

React, Three.js, TailwindCSS

Cyberpunk-themed interactive productivity system with real-time procedural 3D effects and mission-driven task management.

Quantum State Manager

TypeScript, React, State Management

Zero-overhead state management library with time-travel debugging, snapshotting, and predictable immutable state mutations.

Echoes of Eternity

Rust, WebAssembly, Web Audio API

High-performance procedural game engine compiled to WASM for 60fps browser execution with dynamic ambient synthesis.

SKILLS

Cloud & DevOps: AWS, Docker, Kubernetes, Ansible, GitHub Actions, GitLab, Git, Nginx, Apache

Frontend & Mobile: Next.js, React Native, Flutter, JavaScript, Dart, Tailwind CSS

Backend & Services: .NET, NestJS, Node.js, C#, PHP, C++, REST APIs

Databases & ORM: PostgreSQL, MySQL, MongoDB, Microsoft SQL Server, Prisma, Firebase

Tools & Scripting: PowerShell, Postman, Vercel, Canva, Linux

PUBLICATIONS & CONTRIBUTIONS

Interactive Visualization of Quantum State Transitions in Web Environments

ACM Conference on Human Factors in Computing Systems (CHI) - 2023

Analyzing the Impact of Micro-Animations on User Retention in SaaS Platforms

ACM Symposium on User Interface Software and Technology (UIST)

ACTIVITIES & EXTRACURRICULARS

- Active Open Source Contributor across cloud infrastructure, developer toolkits, and DevOps automation.
- Technical mentor at campus developer student clubs and hackathons focusing on cloud-native computing.
