PROFESSIONAL EXPERIENCE

Intern Software Engineer 06/2023 – 12/2023
Koombiyo Delivery Pvt Ltd
- Contributed to internal system development supporting logistics and operations.
- Assisted in developing an inventory management system.
- Supported a driver tracking solution integrating mobile and backend systems.
- Gained exposure to real-world business systems, workflows, and cross-functional collaboration.

TRAINEE PLANNING EXECUTIVE 12/2023 – 01/2024
GIGIRI EMBELLISHMENT PVT LTD

PLANNING EXECUTIVE 01/2024 – 05/2026
GIGIRI EMBELLISHMENT PVT LTD
- Coordinate production planning activities based on buyer requirements, order quantities, and delivery schedules.
- Prepare and manage cut plans, daily output plans, and machine-wise allocations. Issue cut panels and raw materials to relevant embroidery machines according to style, color, and production priority.
- Use Wilcom Embroidery Software for design punching in line with customer specifications. Liaise with factories, buyers, and internal teams to ensure on-time delivery and quality compliance.
- Monitor CPI, production efficiency, and quality control across orders.

SAMPLE AND DEVELOPMENT MERCHANDISER 2026 – Present
GIGIRI EMBELLISHMENT PVT LTD
Developing new styles with the relevant buying offices and coordinating with bulk teams, advising methods and tactics for efficient production.

EDUCATION

Computer Science 2022 – 2025
University of Plymouth(NSBM)
- Graduated with a second-class upper in BSc (Hons) Computer Science from Plymouth University, affiliated with NSBM Green University.
- Served as event coordinator for the NSBM Music Club.

SKILLS

Cloud & DevOps
AWS, Docker, Kubernetes, Ansible, GitHub Actions (CI/CD), GitLab, Git, Github

Frontend & Mobile
Next.js, React Native, Flutter, JavaScript, Dart, Tailwind CSS

Backend & Services
C#, .NET, NestJS, ExpressJS, Node.js, CodeIgniter, PHP, C++, C, Python

Databases & ORM
PostgreSQL, MySQL, MongoDB, Microsoft SQL Server, Prisma, Firebase

Tools & Scripting
PowerShell, Postman, Vercel, Canva, Linux(Ubuntu)

PROJECTS

COCO VANTAGE

NestJs, NextJs, Typescript, Docker, Prisma, PostgreSQL, Neon

- Developed an e-commerce platform for charcoal-based deodorizer products, enabling customers to browse products, place orders, make secure online payments through Stripe, and track their shipments. The platform includes an administrative dashboard for managing sales, inventory, and order fulfillment.
- Implemented an online shopping and ordering experience to streamline product purchases and customer transactions.
- Integrated the Stripe payment gateway to facilitate secure online payment processing.
- Developed order and shipment tracking functionality to help customers monitor their purchases.
- Built an administrative dashboard for centralized management of sales, inventory, and customer orders.
- Streamlined e-commerce operations by bringing product management, order processing, and sales monitoring into one platform.
- Key Areas: E-commerce Development, Stripe Payment Integration, Order Management, Shipment Tracking, Inventory Management, Sales Analytics, Admin Dashboard.

Kivi

Flutter, Dart, NestJs, PostgreSQL, Docker, Github, Github actions

- Designed and developed a cloud-based Point-of-Sale (POS) system for small and medium-sized enterprises (SMEs), offering a subscription-based business model. Built to support sales and inventory operations across devices, the platform enables businesses to manage products, track inventory, and add items using mobile phones or PCs, with barcode scanning and both online and offline functionality.
- Developed a cross-platform application using Flutter and backend services using NestJS, with PostgreSQL for data storage and management.
- Implemented inventory management features to manage products, stock levels, and item information.
- Designed role-based access management through an administrative panel, allowing business owners to grant appropriate access to multiple users.
- Supported product entry and barcode scanning using mobile phones, alongside PC-based workflows.
- Designed the system to support online and offline usage, enabling businesses to continue essential POS operations with limited or no internet connectivity.
- Integrated GitHub Actions into the development workflow to automate CI/CD tasks and streamline software delivery

Smart Home IoT Management System

TypeScript, NodeJs, NextJs, ExpressJS, PostgreSQL, C++, Arduino UNO, JavaScript, React Native

- Designed and developed a smart home IoT management system for large buildings and organizations, enabling centralized monitoring and control of devices such as lights and fans. Built a web-based management platform using Next.js, Express.js, and React Native, integrated with ESP32 and Arduino UNO microcontrollers programmed in C++ for hardware-level device control.
- Developed a centralized admin dashboard for managing devices, rooms, users, and access permissions across the building.
- Implemented room management and user access control to ensure authorized individuals could manage designated spaces and devices.
- Integrated IoT hardware with the software platform to enable remote control of connected electrical appliances.
- Designed a scalable management solution to support multiple rooms, users, and connected devices within large building environments.
