LAKNIDU THILAKAWARDHANA

DEVOPS & SOFTWARE ENGINEER

laknidut@gmail.com | +94 768671725 | laknidu777-77lvjf0ld-lucky-c2db.vercel.app | github.com/laknidu777 | linkedin.com/in/laknidu-thilakawardl

PROFILE SUMMARY

DevOps and Software Engineer with proven expertise in orchestrating scalable cloud infrastructure, automated CI/CD pipelines, and high-performance full-stack applications. Experienced in Docker, Kubernetes, AWS, and modern microservices using .NET, NestJS, and Next.js. Dedicated to system reliability, infrastructure-as-code, and crafting frictionless developer workflows.

WORK EXPERIENCE

Intern Software and Devops Engineer - Koombiyo delivery **Jan 2024 - Present**

- Architected and managed scalable cloud deployments on AWS with automated CI/CD pipelines using GitHub Actions, cutting release cycles by 55%.
- Implemented micro-frontend architectures with Next.js and optimized backend rendering pipelines, resulting in a 40% reduction in latency.
- Containerized core services with Docker and orchestrated workloads on Kubernetes, maintaining 99.98% system uptime.

EDUCATION

BSc (Hons) in Computer Science (Second Upper Class Honours) **2022 - 2025**

NSBM

PROJECTS

COCO VANTAGE

NestJs, NextJs, Typescript, Docker, Prisma, PostgreSQL, Neon

Developed an e-commerce platform for charcoal-based deodorizer products, enabling customers to browse products, place orders, make secure online payments through Stripe, and track their shipments. The platform includes an administrative dashboard for managing sales, inventory, and order fulfillment.

Implemented an online shopping and ordering experience to streamline product purchases and customer transactions.

Integrated the Stripe payment gateway to facilitate secure online payment processing.

Developed order and shipment tracking functionality to help customers monitor their purchases.

Built an administrative dashboard for centralized management of sales, inventory, and customer orders.

Streamlined e-commerce operations by bringing product management, order processing, and sales monitoring into one platform.

Key Areas: E-commerce Development, Stripe Payment Integration, Order Management, Shipment Tracking, Inventory Management, Sales Analytics, Admin Dashboard.

Kivi

Flutter, Dart, NestJs, PostgreSQL

Designed and developed a cloud-based Point-of-Sale (POS) system for small and medium-sized enterprises (SMEs), offering a subscription-based business model. Built to support sales and inventory operations across devices, the platform enables businesses to manage products, track inventory, and add items using mobile phones or PCs, with barcode scanning and both online and offline functionality.

Developed a cross-platform application using Flutter and backend services using NestJS, with PostgreSQL for data storage and management.

Implemented inventory management features to manage products, stock levels, and item information.

Designed role-based access management through an administrative panel, allowing business owners to grant appropriate access to multiple users.

Supported product entry and barcode scanning using mobile phones, alongside PC-based workflows.

Designed the system to support online and offline usage, enabling businesses to continue essential POS operations with limited or no internet connectivity.

Integrated GitHub Actions into the development workflow to automate CI/CD tasks and streamline software delivery.

SKILLS

Cloud & DevOps: AWS, Docker, Kubernetes, Ansible, GitHub Actions, GitLab, Git, Nginx, Apache
Frontend & Mobile: Next.js, React Native, Flutter, JavaScript, Dart, Tailwind CSS
Backend & Services: .NET, NestJS, Node.js, C#, PHP, C++, REST APIs
Databases & ORM: PostgreSQL, MySQL, MongoDB, Microsoft SQL Server, Prisma, Firebase
Tools & Scripting: PowerShell, Postman, Vercel, Canva, Linux
